

Important changes in the filling in of the Intrastat statistical declaration starting with reference month January 2014

➤ **Modified nomenclatures**

2014 version of the Combined Nomenclature contains 35 new codes at 8-digit level while 28 codes at 8-digit level were abolished from the 2012 version of the CN. Total CN codes 8-digit level is 9385. The Combined Nomenclature is available in electronic format on the website www.intrastat.ro.

➤ **Changes of the offline Intrastat application:**

The Intrastat Declarations for year 2014 will be done using the offline **Intrastat Application 2014 version** that we kindly ask you to install it on your computer **starting with 1st February 2014**. By installing the 2014 offline Intrastat Application, the executable version used in 2012 will be automatically uninstalled, keeping the previous Intrastat declarations and nomenclatures related to the previous year.

ATTENTION! The 2014 offline Intrastat Application are set by default the Combined Nomenclature 2013.

Thus, after installing the 2014 offline Intrastat Application, to create declarations for the months of the year 2014, you must load the 2014 Combined Nomenclature (CN 2014), by using the "Import" function from the menu "Tasks / Nomenclatures" (see chapter 1.3.5 from the „User guide for Intrastat offline application”).

Please pay a special attention to the selection of reference year since the goods nomenclature (CN8 nomenclature) is subject to changes every year, thus making necessary yearly updating of it in the Intrastat Applications. As a consequence the Combined Nomenclature 2014 differs from the one applied in 2013.

After installing the 2014 version of the offline Intrastat application, it is necessary to run the procedure of import of declarations for 2013 that have been created with 2013 version of offline Intrastat application, in order to be able to view / revise them, if necessary. The import procedure of these declarations can be done by using the menu „View Declarations Archive” (see chapter 1.3.4. - Importing and saving a previously created declaration, from the „User guide for Intrastat offline application”).

The Intrastat offline application version 2014 can be also used to create or revise Intrastat declaration for 2013.

The working procedure if you want to create or to revise the Intrastat declaration for the months of the year 2013 is the following:

I. to revise a declaration created with the 2013 Intrastat application – the selection of CN8 nomenclature version 2011 will be automatically when you open the declaration from the menu “Tasks/View Declarations Archive”.

II. to create NEW declarations for 2013:

Attention! In order to create NEW declarations for 2013 after installing the 2014 version of Intrastat offline application and the import of the nomenclature for year 2014, it is necessary to follow the following steps in order to use the nomenclatures in force for 2013:

Step 1: Remove the Combined Nomenclature version 2014 as follows: in the menu „Tasks / Nomenclatures” select the CN8 2014 version, and then use the „Remove” button from the same window (Figure 1). This step is necessary to activate the CN8 2013 version.

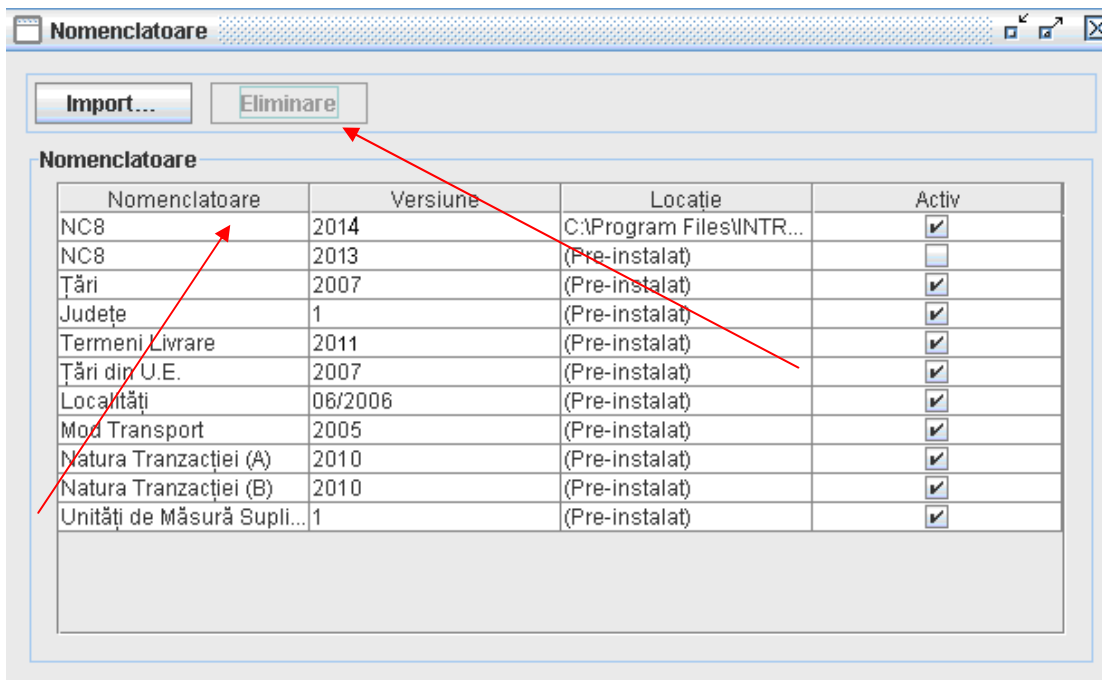

Figure 1: Nomenclatures Administration - remove nomenclature CN8 2014

Step 2: Create a „NEW” Intrastat declaration for 2013 (please pay a special attention when selecting the reference period!!)

Step 3: Return to the combine nomenclature CN8 for 2014 for creating Intrastat Declarations for 2014.

This will be done through the menu „Tasks / Nomenclatures”, where the “Import” button must be used and then selected CN_2014.xml file from „Documentație” directory, subdirectory of the working directory. The default working directory is set up to C:\Program_files\Intrastat. After running this procedure the Combined Nomenclature NC8 version 2014 will be automatically activated.
